"Where we treat every pet as our own"

What is your name?

Do you have a cat or dog?

Cat

Dog

What is your pet's name?

What brings you and your pet in today?

Let's talk about labwork

Thank you for trusting us with your pet's care. Because we believe in preventative care, we recommend yearly lab work for all pets. By the time your pet shows signs of illness he or she may already have advanced disease. By performing these test; which are much like the test which you have done by your physician at your own check-ups, we can find problems early when they are easier to manage.

Would you like to run lab work on your pet this year?

Yes

No

I am not sure, I need more information

Let's talk about microchips.

A chip greatly increases the likelihood that your pet will be returned to you if they are lost. Several recent studies show that cats with microchips are 20 times more likely to be returned to their owner and chipped dogs are returned 2.5 more than unchipped dogs. That's a pretty significant difference and with over 10 million pets being lost each year, you want to do everything you can to ensure your pet finds its way back to your home.

Would you like a microchip placed today?

Yes

No

My pet has one please scan and check

Our goal is to customize your pet's vaccinations to his or her specific needs. These questions help us determine the best vaccine protocol for your pet.

How much outdoor exposure does your cat have?

0%

0-25%

25-50%

50-75%

Supplements:

Your Pet's Diet

What brand of food are you feeding?

What form of food do you feed?

Can

Dry

How many cups/cans are you feeding?

I feed my pet

Once a day in the morning

Once a day in the evening

Morning and Evening

Morning, Mid-day, and Evening

I leave food down all the time, refill as needed

Other

My pet gets treats

Daily

On special occasions

Multiple times a day

Rarely to never

How many treats do you give your pet?

Just 1 at a time

2-5 at a time

Handful

As many as they want, happy pet happy life!

Let's Talk about your pets oral health

On average, dogs and cats benefit from dental cleaning once a year starting at the age of 3, but every pet needs his or her own individual dental program. Some cats and dogs might need less frequent cleanings, others more. Your veterinarian will work with you to decide what's best for your pet.

Select all that apply:

Brush teeth with pet friendly toothpaste

Oral Rinse

Water additive

Dental treats

My pet gets something for their oral health

25% of the time, 1-2 times a week

50% of the time, every other day

75% of the time, almost daily

100%, daily

Thank you for trusting us with your pets!
